PROJECTS

Consultancy Firm

- The main purpose of this project is to create a consultancy form for a job fair using graphical user interface in java.It creates frame to enter student details and displays suitable jobs based on entered details and also creates the CV for students.

College Event Management System

- The event Management system includes overall event design, Extra Curricular Activities. The system allows registered users to login and new users are allowed to register on the application.It allows the user to select from a list of event types.Once the user enters an event type the system then allows the user to select the date and time of event.
